

EXPERIMENT 6

Teachable Machine - In Browser Object Recognition through Brain JS.

Aim:

To implement Teachable Machine - In Browser Object Recognition through Brain JS.

Description:

What is Teachable Machine?

Teachable Machine is a web-based tool that makes creating machine learning models fast, easy, and accessible to everyone.

How do you use it?

Teachable Machine is a web tool that makes it fast and easy to create machine learning models for your projects, no coding required. Train a computer to recognize your images, sounds, & poses, then export your model for your sites, apps, and more.
